In addition, these entities, sites and locations may share medical information with each other for treatment, payment or hospital operations purposes described in this notice.
- Any health care professional authorized to enter information into your hospital chart on behalf of these entities.
- All departments and units of the hospital.
- Any member of a volunteer group we allow to help you while you are in the hospital.
- All employees, staff and other hospital personnel.

This notice describes the ways in which we may use and disclose your medical information. It also describes your rights and certain obligations we have regarding the use and disclosure of your medical information.

We are required by law to:

- ensure that medical information that identifies you is kept private;
- give you this notice of our legal duties and privacy practices with respect to medical information about you; and follow the terms of the notice that is currently in effect.

Understanding Your Health Record/ Information. Each time you visit a hospital, physician, or other healthcare provider, a record of your visit is made. This record typically contains your symptoms, medical history, examination, test results, diagnoses, treatment, and a plan for future care or treatment. This information, often referred to as your health or medical record, serves as a:

- basis for planning your care and treatment
- means of communication among the many health professionals who contribute to your care
- legal document describing the care you received
- means by which you or a third-party payer can verify that services billed were actually provided
- tool in educating health professionals
- source of data for medical research
- source of information for public health officials charged with improving the health of the nation
- source of data for facility planning and marketing
- tool with which we can assess and continually work to improve the care we render and the outcomes we achieve

Understanding what is in your record and how your health information is used helps you to:

- ensure its accuracy
- better understand who, what, when, where, and why others may access your health information
- make more informed decisions when authorizing disclosure to others

How we may store medical information about you. Your medical record may be handwritten, printed, typed or in electronic digital media. Parts of the record that are handwritten, printed or typed may also be converted

to electronic digital media under Massachusetts law. We may destroy all or a portion of your medical record in the future, but only after the applicable legally required retention period has elapsed and we have notified the Massachusetts Department of Public Health in accordance with its regulations. At present, the Hospital's record retention policy provides that medical records will be retained for a period of 20 years.

How we may use and disclose medical information. The following describes different ways that we are permitted to use and disclose medical information. For each category of uses or disclosures we will explain what we mean and try to give some examples. Not every use or disclosure in a category will be listed. However, all of the ways we are permitted to use and disclose information will fall within one of the categories.

- **For Treatment.** We may use your medical information to provide you with medical treatment or services. We may disclose medical information about you to doctors, nurses, technicians, medical students, or other hospital personnel who are involved in caring for you at the hospital or outside the hospital. Different departments of the hospital also may share medical information about you in order to coordinate the different services/treatments you need, such as prescriptions, laboratory work, and x-rays. We may also disclose medical information about you to people who may be involved in maintaining your health or well being during your hospital stay and after discharge, such as family members, friends, home health services, support agencies, clergy, or others who provide services that are necessary for your well being.
- **For Payment.** We may use and disclose your medical information so that the treatment and services you receive at the hospital may be billed and payment may be collected from you, an insurance company, or a third party. We may tell your health plan about a treatment you are going to receive in order to obtain prior approval or to determine whether your plan will cover the treatment. We may also give information to someone who helps pay for your care.
- **For Health Care Operations.** We may use and disclose your medical information for hospital operations. Hospital operations are activities that are necessary to run the hospital and to make sure that all of our patients receive quality care. We may combine medical information about many hospital patients for purposes of making decisions about what additional services the hospital should offer, what services are not needed, and whether certain new treatments are effective. We may also disclose information to doctors, nurses, technicians, medical students, and other hospital personnel for review and learning purposes. When we do this, information that identifies you may be removed from this set of medical information so others may use it to study health care and health care delivery without learning who the specific patients are. If ownership of the hospital changes as a result of sale, transfer, merger or consolidation, your medical information would be disclosed to the new entity, if that entity was to follow the same privacy policies.
